

WHY MEDICATION SYNCHRONIZATION?

→ IMPROVES ADHERENCE

- Creates the/an opportunity to fill more prescriptions annually per patient, on average
- Helps you improve star ratings, a key measure health plans use to determine continued plan inclusion

→ IMPROVES WORKFLOW

- Creates time to add top-line revenue generators like immunizations, CMR, or other MTM consultations
- Reduces wait time at the pharmacy, improving the customer experience in your stores
- Levels out staffing needs across the week

→ STRENGTHENS FINANCIALS

- Increases scripts per patient
- Lowers expenses per script
- Improves inventory management

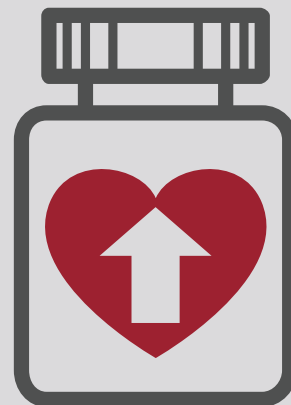

→ IMPROVES STAFF RELATIONSHIPS

- Reduces “crunch times” to even out the workload
- Provides time for staff to enhance training and skills

→ INCREASES PATIENT SATISFACTION

- Strengthens connection with a pharmacist, which is a strong predictor of adherence
- 98% of patients say it's more convenient to have meds synched
- Reduces the complexity of regimens, especially for patients with chronic conditions
